

Mission Partners

Core-Awareness-Training

If end-to-end mission process improvement is at the heart of the ISE, then mission partners are the engines that build and operate the ISE. Mission partners are the bureaus and agencies of federal, state, and local, and tribal governments, and our partners in the private sector and internationally that plan, manage and operate the mission processes, anywhere, that have a material impact on detecting, preventing, disrupting, responding to, or mitigating terrorist activity. They span five communities ? Defense, Intelligence, Homeland Security, Foreign Affairs, and Law Enforcement ? and support the primary users of the ISE - the frontline law enforcement, public safety, homeland security, intelligence, defense, and diplomatic personnel that are working every day to keep our country safe.

The support of mission partners is critical to the success of the ISE. They have mission responsibility and a vital leadership role for delivery, operation, and use of the ISE, and are accountable for delivering mission value by aligning policy, processes, and information. The role of PM-ISE, therefore, is to bring ISE mission partners together to collaborate and support shared, cross-organizational solutions based on collective mission equities, to build consensus to prioritize funding and deliver on the shared vision, and to provide a collective management and governance framework to accelerate nationwide results.

The ISE supports several missions and services vital to the protection of our country:

- Law Enforcement Information Sharing
- Nationwide SAR Initiative (NSI)
- Alerts, Warnings, and Notifications (AWN)
- Cargo and person Screening
- Terrorist Watchlist
- Sharing and International Partners
- Sharing with the Private Sector
- Assured Sensitive by Unclassified (SBU) Interoperability
- Interagency Threat Assessment and Coordination Group (ITACG)
- State and Major Urban Area Fusion Centers
- Controlled Unclassified Information (CUI)
